From: City Hall
Re: Precautionary Boil Advisory

Due to a water main being repaired, pressure could have been reduced low enough to allow contaminants to enter the water service that serves your business\home. For your safety, please read the information that has been provided with this letter. The system will be tested as soon as pressure is restored, and I apologize for this inconvenience. You will be notified as soon as the result of the testing comes back safe. This affects those who are serviced by Butler Water. Again, this is a **Precautionary Boil Advisory**. If you have additional questions, please feel free to contact us at City Hall 660-679-4182.

Thanks,

City Hall

Recommended Boil Advisory Procedures

Local health authorities recommend that consumers take the following precaution during boil advisories:

Boil water vigorously for three (3) minutes prior to use for cooking or drinking, and disinfecting dishes by immersing them for at least one (1) minute in water containing one (1) teaspoon of unscented household bleach to each gallon of water.
